

RATING ACTION COMMENTARY

Fitch Affirms Enel Colombia's IDR at 'BBB'; Outlook Stable

Tue 12 Mar, 2024 - 14:49 ET

Fitch Ratings - Rio de Janeiro/Bogota - 12 Mar 2024: Fitch Ratings has affirmed Enel Colombia S.A. E.S.P.'s (Enel Colombia) Long-Term Foreign and Local Currency Issuer Default Ratings (IDRs) at 'BBB'. Fitch has also affirmed the company's National Long and Short-Term ratings at 'AAA(col)' and 'F1+(col)', respectively, as well as the ratings on its local issuance programs. Rating Outlook is Stable.

Enel Colombia's ratings reflect Fitch's view on the strategic incentive that Enel Americas S.A. (BBB+/Stable) has to support its subsidiary. Enel Colombia will represent approximately 30% of its parent EBITDA generation, remaining within the perimeter of the group's assets in Latin America, resulting in a bottom up approach following Fitch's Parent and Subsidiary Linkage Rating Criteria revised approach between Enel Colombia and its parent. The ratings also reflect the company's low leverage, solid contracted position, combined with strong liquidity.

KEY RATING DRIVERS

Revised PSL Assessment: Per Fitch's Parent and Subsidiary Linkage Rating Criteria, there is sufficient control by Enel Americas, owning approximately 57.4% of Enel Colombia. Strategic Incentives has been revised to medium from weak, as Enel Colombia is view as a strategic subsidiary to its parent's global in terms of the financial contribution and growth potential. Upon completion of Enel Americas' divestment plan, with the exit of Peru and Argentina, Enel Colombia will represent approximately 30% of Enel Americas consolidated EBITDA.

Legal incentives remain weak, as there are no guarantees in place from the parent or cross-default clauses. Operational incentives are low, both entities have the same core business, and there is some material common management, operational benefits to the parent are

not material. All these factors combined, Enel Colombia's ratings result in a 'bottom up plus one' approach to an IDR of 'BBB', from the previous standalone approach.

Country Ceiling: The company is headquartered in Colombia (BB+/Stable), and the operation in this country represented approximately 93% of the consolidated EBITDA during 2023. Fitch caps Enel Colombia's standalone credit profile at Colombia's 'bbb-' given the substantial cash flow generation coming from this country. Cash flows from the operations in Panama (BBB-/Negative), Guatemala (BB/Stable) and Costa Rica (BB/Stable), exceed the company's next 12 months of hard currency debt service coverage by more than 1.5x.

Strong Leverage Profile: Fitch anticipates Enel Colombia's EBITDA Leverage will remain below 2.0x over the rated horizon, coupled with EBITDA fixed charge coverage ratios around 5.0x. Furthermore, the company maintains a conservative financial policy mitigating foreign exchange (FX) risk. Fitch expects the company will maintain debt in the same currency as cash flows are generated reducing FX risk, combined with a manageable debt maturity profile.

Stronger Generation Business: Fitch anticipates the generation segment will contribute more than 60% of the company's consolidated EBITDA over the rating horizon. Enel Colombia's business profile has continued to strengthen after the merger of Emgesa and Codensa, and the inclusion of renewable generation assets from Central America. The company's generation business registered roughly 25TW/h of total net energy sales during 2023, with Colombia representing 87%. In terms of installed capacity, ranks as the second largest generation company in Colombia with 3,390MW, while Central America adds 705MW of installed capacity.

In Colombia, the company has a well-diversified portfolio mostly concentrated in renewable sources of 12 hydro plants and four solar plants in a testing period. The scale and diversity of its asset base gives the company higher operational flexibility relative to smaller and less-diversified generation companies, and improves predictability of operating cash flow.

Mitigated Hydrological Risk: Enel Colombia mitigates this risk through geographic diversification of its generation matrix, operation of one thermal asset and contractual energy purchases. The diversification in different basins allows the company to maintain stability in energy generation amid severely dry seasons. During 2023, the country suffered drier conditions, the company's total net production reached 16TW/h annually, 17% higher compared with the previous year, as Enel Colombia's commercial policy aims to maintain contract sales at 85%-90% of its sales mix.

The current generation matrix could expose it to some cash flow volatility under scenarios of adverse hydrology conditions or major disruptions to one of its larger plants, forcing the company to purchase energy in the spot market at higher prices to fulfil contractual obligations. The expansion towards renewable projects will allow the company to complement its energy matrix.

Distribution Business Adds Stability: Fitch estimates the distribution business will represent approximately 40% of the company's EBITDA over the rating horizon. Enel Colombia's business profile benefits from the electricity distribution and commercialization business in Colombia as part of the new structure. The company is positioned as the leading distribution company in Colombia, providing more than 15TW/h annually and serving 3.9 million customers as of YE 2023. The regulated nature of the distribution business adds stability and predictability to the cash flow generation.

DERIVATION SUMMARY

Enel Colombia is well positioned relative to regional investment-grade electric company peers, including Isagen S.A. E.S.P. (Isagen; BBB-/Stable), AES Andes S.A. (BBB-/Stable), Engie Energia Chile S.A. (Enel Generacion Chile; BBB/Stable), Enel Chile S.A. (Enel Chile; BBB+/Stable) and Enel Generacion Chile S.A. (BBB+/Stable). All of these companies benefit from predictable cash flow from operations, stemming from robust business profiles and conservative capital structures.

Differences in specific rating levels are largely a function of revenue mix, both geographically and by business, along with asset base diversification and the presence of long-term contract sales. Enel Colombia's business profile is similar to other integrated utilities such as Engie Chile and Enel Chile, and lower than pure generation companies such as Isagen. Enel Colombia's benefits from a stronger financial profile relative to peers, with leverage expected to remain below 2.0x over the rating horizon. This is similar to Enel Generacion Chile and lower compared to Enel Chile and Isagen at 3.0x.

Enel Colombia also compares well with electricity generation peers that have national ratings, namely Isagen, Empresas Publicas de Medellin E.S.P. (EPM) and Celsia Colombia S.A. E.S.P., all rated 'AAA(col)'. Enel Colombia has the second largest installed capacity and the most conservative capital structure within this group with 3.390MW. Fitch projects Isagen and Celsia Colombia's leverage to average 3.3x and 3.0x, respectively.

EPM benefits from business and geographical diversification, which contributes to solid and predictable cash flows. Leverage is expected to average 3.5x over the rating horizon. EPM's

ratings are on Rating Watch Negative as a result of continued uncertainty regarding the development of the Ituango project.

Enel Colombia has lower scale of operations and EBITDA generation compared to its ultimate parent Enel SpA (BBB+/Stable). Enel is one of the largest integrated utilities in the world, based in Italy, with a leading position in renewables, distribution and supply. In addition, Enel SpA consolidates Endesa, market leader in Spain and is the second-largest power company in Portugal.

KEY ASSUMPTIONS

--Net Energy production around 16,000 gigawatt-hours (GWh) in Colombia per year during 2024-2026;

-- Commercial policy contract sales remain between 85% and 90% of total volume sales.

--Annual hydrological production between 13,000GWh and 14,000GWh during 2024-2026;

--Distribution business with energy sales of approximately 15,000GWh annually during 2024-2026;

--Capex of approximately COP7.4 billion between 2024-2026;

--Dividend payout ratio of 90% of net income during 2024-2026.

RATING SENSITIVITIES

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

--A wider business and geographic diversification in investment-grade countries that strengthens the company's cash flow generation;

--A strengthening of the linkage with its parent Enel Americas through the existence of legal ties.

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

--A downgrade of Colombia's Sovereign Rating or a Negative Outlook;

--A change in financial strategy resulting in an increase in hard-currency debt;

--A sustained increase in leverage above 3.5x.

LIQUIDITY AND DEBT STRUCTURE

Strong Liquidity: Enel Colombia's credit profile is supported by ample consolidated liquidity, as the company's cash position reached COP1,204 million (roughly USD280 million) at Sept. 30, 2023. Enel Colombia's liquidity is robust, supported by a healthy cash position, prospective stable CFO and a manageable debt maturity profile. Fitch estimates available cash on hand plus forecast CFO will cover more than 4x short-term maturities as of YE 2023. Debt refinancing risk is low, given conservative leverage, a manageable debt maturity profile and ample access to liquidity sources.

Liquidity is further buoyed by COP3.5 trillion undrawn uncommitted revolving credit facility and COP5.7 trillion available from its local program issue, which provides additional flexibility if required.

ISSUER PROFILE

Enel Colombia is the second largest electricity generation company in Colombia with 3.4 GW of installed capacity and 0.8 GW of renewable projects under construction. It also has 644MW of generation capacity in Central America and 60MW under construction. Enel Colombia is the main distribution company in Colombia, serving approximately 21% of the country's electricity demand.

ESG CONSIDERATIONS

The highest level of ESG credit relevance is a score of '3', unless otherwise disclosed in this section. A score of '3' means ESG issues are credit-neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit

<https://www.fitchratings.com/topics/esg/products#esg-relevance-scores>.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers.

Please read these limitations and disclaimers by following this link:

<https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. ESMA and the FCA are required to publish historical default rates in a central repository in accordance with Articles 11(2) of Regulation (EC) No 1060/2009 of the European Parliament and of the Council of 16 September 2009 and The Credit Rating Agencies (Amendment etc.) (EU Exit) Regulations 2019 respectively.

Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at

<https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The complete span of best- and worst-case scenario credit ratings for all rating categories ranges from 'AAA' to 'D'. Fitch also provides information on best-case rating upgrade scenarios and worst-case rating downgrade scenarios (defined as the 99th percentile of rating transitions, measured in each direction) for international credit ratings, based on historical performance. A simple average across asset classes presents best-case upgrades of 4 notches and worst-case downgrades of 8 notches at the 99th percentile. Sector-

specific best- and worst-case scenario credit ratings are listed in more detail at <https://www.fitchratings.com/site/re/10238496>

The information in this report is provided “as is” without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the

Corporations Act 2001. Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
