# Emgesa S.A. E.S.P.

Fitch Ratings affirmed Emgesa S.A. E.S.P.'s Long-Term Foreign and Local Currency Issuer Default Ratings (IDRs) at 'BBB' on April 7, 2020. The Rating Outlook on the Foreign Currency IDR is Negative and the Local Currency IDR's Outlook is Stable. Fitch also affirmed the company's senior unsecured notes due 2021 at 'BBB' and its Long-Term National-Rating at 'AAA(col)' with a Stable Outlook.

Emgesa's ratings reflect the company's strong business model, supported by asset diversification, a solid competitive position and consistently strong cash flow from operations. The company maintains robust cash flows, which, along with expectations of limited capex execution, underpins Fitch's expectations for Emgesa to maintain low financial leverage in the medium term. The company's adequate liquidity position and strategic importance to its shareholders are also factored into the ratings.

Emgesa's ratings are constrained by Colombia's Country Ceiling of 'BBB'. The Negative Outlooks on the Foreign Currency rating reflects Colombia's Negative Outlook. Emgesa operates within Colombia and does not have substantial offshore cash or EBITDA from other countries.

Fitch considers Emgesa well prepared to face the current lockdown environment as a result of the coronavirus pandemic, given its conservative capital structure and strong liquidity position, supported by cash flow visibility. Between 80% and 85% of sales are supported by contracts with limited exposure to volumetric risk. The company recently secured a one-year committed credit line as a precautionary measure to bolster liquidity. Noncore capex will likely be delayed, with a focus only on maintenance requirements.

## Key Rating Drivers

**Solid Business Position:** Emgesa's ratings factor in its robust business position in the electricity-generation market in Colombia. As of YE 2019, the company remained the country's largest generation company in terms of installed capacity and volume generated. The company has a well-diversified portfolio of 12 hydro and two thermal plants. Total capacity remains at 3,506MW, making up 20% of Colombia's generation matrix.

The scale and diversity of Emgesa's asset base gives it higher operational flexibility relative to smaller and less-diversified generation companies (gencos), and improves predictability for the operational cash flows.

**Conservative Capital Structure:** Fitch expects Emgesa to maintain positive FCF under normal hydrology conditions in the medium term, driven primarily by annual EBITDA of COP2.0 trillion–COP2.5 trillion. Emgesa's EBITDA could be spurred by possible higher spot prices in the short to medium term, amid growing electricity demand and relatively stable installed capacity in 2020–2021.

The company's FCF benefits from limited capex requirements through the medium term and its current dividend payout of 70%. This is reflected in low leverage metrics, which Fitch expects to remain below 1.5x for the rating horizon.

**Moderate Business Risk:** Emgesa's matrix size and diversification mitigate the risk of operating in the competitive electricity-generation business in Colombia, which depends on hydrology conditions as well as energy and fuel prices. Colombia's electricity sector operates under a shorter-term contract structure relative to other countries in the region, which exposes gencos to some recontracting risk.

Emgesa combines geographic diversification and backup thermal generation capacity totaling 409MW to mitigate the hydrological risk posed by a portfolio 88% weighted to hydro

generation. The diversification in different basins allows the company to maintain stability in energy generation during severely dry seasons.

**Exposure to Hydrological Risk:** Fitch believes Emgesa's commercial policy could expose it to cash flow volatility under adverse hydrology conditions or major disruptions at its plants, as the company might be forced to purchase energy in the spot market, where prices react to hydrology conditions. The commercial policy aims to maintain contract sales at 80%–85% of its sales mix to capture higher prices under low spot prices. Emgesa hedges this risk through geographic diversification of its generation matrix, operation of thermal assets and contractual energy purchases.

**Standalone Approach:** Fitch assesses Emgesa's credit profile on a standalone basis. Fitch sees Emgesa as a strategic investment for its controlling shareholder, Enel S.p.A. (A–/Stable), through Enel Americas S.A. (A–/Stable), considering the importance of Enel's Colombian operations on EBITDA. They make up roughly 21% of EBITDA generated in the region. The absence of legal ties, weak to moderate operational ties and the presence of an important minority shareholder weaken the parent-subsidiary linkage.

**Shareholder Dispute:** Fitch will continue to monitor the arbitration process initiated by Grupo Energia Bogota S.A. E.S.P. against Enel Americas related to Emgesa's dividend-distribution policy, as well as related-party transactions. Fitch believes visibility is limited on the potential impact of the arbitration's resolution on Emgesa's governance and its financial metrics. However, in general terms, Fitch believes Emgesa's credit profile can withstand reasonable adverse resolution scenarios.

### **Rating Derivation Relative to Peers**

Emgesa is well positioned relative to regional investment-grade electric company peers, including Isagen S.A. E.S.P. (BBB/Negative), Enel Generacion Chile S.A. (A–/Stable), Engie Energia Chile S.A. (BBB/Positive), Colbun S.A. (BBB/Positive) and AES Gener S.A. (BBB–/Stable). These companies benefit from predictable cash flow from operations, stemming from robust business profiles and conservative capital structures. Emgesa is rated a notch lower than Enel Generacion Chile and Enel Americas, because these companies maintain more diversified asset bases. Enel Generacion Chile has more than 6,000MW of installed capacity, with greater thermal assets and material participation in wind plants, which allow it to mitigate hydrological risks. Enel Generacion Chile maintains a conservative capital structure, with leverage consistently below 1.5x.

Emgesa's ratings are in line with those of Engie and Colbun. Emgesa maintains a more conservative capital structure, with projected leverage trending toward 1.5x, while Fitch's projection for Colbun is 2.5x–3.0x and around 2.0x for Engie, down from 3.0x in 2017. The Chilean peers benefit from a longer-term contractual position, with an average power purchase agreement remaining life of at least nine years, which mitigates recontracting risk. These contracts also have adequate indexation mechanisms that largely mitigate their exposure to fuel price volatility, which adds to the predictability of cash flow from operations.

Colombian generators are more exposed to recontracting risk, because electricity demand is mostly driven by the regulated market, which tends to purchase electricity with tenures of around three years. Part of Emgesa's strategy focuses on extending the tenure of contracts

within the nonregulated market, but this segment represents around one-third of Colombian electricity demand.

Emgesa also compares well with electricity generation peers that have national ratings, namely Isagen, Empresas Publicas de Medellin E.S.P. (EPM) and Celsia Colombia S.A. E.S.P., all rated 'AAA(col)'. Emgesa has the highest installed capacity and most conservative capital structure within this group. Fitch projects Isagen's leverage is around 3.0x and expects Celsia Colombia to reduce leverage to 2.5x in the medium term. EPM's credit profile benefits from diversification across business sectors and geographies, which contributes to solid and predictable cash flows. EPM's ratings are nevertheless on Rating Watch Negative as a result of continued uncertainty regarding the development of its Hidroituango project.

## **Rating Sensitivities**

# Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

• Fitch considers a positive rating action unlikely in the near term, given business and geographic concentration in electricity generation in Colombia.

# Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

- A steep decline in electricity prices, coupled with low generation and poor electricity demand that put significant pressure on EBITDA generation;
- Changes in regulation that pressures Emgesa's cash flow from operations;
- A sustained increase in leverage above 3.5x;
- A change in the company's strategy that results in a more aggressive policy in terms of leverage, capex or acquisitions;
- A downgrade of Colombia's Country Ceiling.

## Liquidity and Debt Structure

**Strong Liquidity:** Fitch considers Emgesa's liquidity to be adequate, supported by a healthy cash balance, stable cash flow from operations, limited capex requirements and a manageable debt maturity profile. The company reported approximately COP284 billion in available cash and around COP246 billion in short-term debt at YE 2019, with approximately COP241 billion corresponding to local bonds due May 2020, which should be paid off using internally generated cash. Fitch expects the company will maintain positive FCF in the medium term, which will contribute to debt maturity payments.

The company reported COP2.9 trillion of financial debt as of YE 2019, down from around COP3.7 trillion at YE 2018, as the company used FCF to pay off current maturities. Emgesa's financial debt comprises COP2.2 trillion of local bond issuances (around 75% of total debt) and COP736.76 million of international bond issuance indexed to local currency due in January 2021 (around 25%), with the remainder from credit loans and leases. Emgesa's financial debt is fully expressed in local currency. Fitch considers Emgesa's debt refinancing risk to be low, given its moderate leverage, manageable debt profile and ample access to liquidity sources.

As of YE 2019, the company reported available uncommitted credit lines of COP3.9 trillion jointly with related company Codensa S.A., with proven access to local and international capital markets, which reinforces its liquidity position. The company has a manageable debt-amortization profile compared with its strong cash flow from operations capacity. A COP736.77 million international bond issuance matures in January 2021, and the company is assessing alternatives to refinance this maturity. The company recently contracted a 12-month committed credit line for USD65 million to support liquidity.

### **ESG** Considerations

Environmental, Social and Governance (ESG) issues are credit neutral or have only a minimal credit impact on the entity, either due to their nature or the way in which they are being managed by the entity. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

#### How to Interpret the Forecast Presented

The forecast presented is based on Fitch Ratings' internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch Ratings to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch Ratings' rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch Ratings' forecasts are would make. Fitch Ratings' own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch Ratings may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch Ratings' own internal deliberations, where Fitch Ratings, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch Ratings may update the forecast in future reports but assumes no responsibility to do so. Original financial statement data for historical periods is processed by Fitch Solutions on behalf of Fitch Ratings. Key financial adjustments and all financial forecasts or credited to Fitch Ratings are generated by rating agency staff.

#### Corporates Electric-Corporate Colombia

## **Fitch**Ratings

### Emgesa S.A. E.S.P.

### **Corporates Ratings Navigator**

bbb Strategy may include opportunistic elements but soundly implemented.

significant related-party transactions.

companies in major exchanges.

Good CG track record but effectiveness/independence of board less obvious. No evidence of abuse of pow er even with ow nership concentration.

Some group complexity leading to somew hat less transparent accounting statements. No

Good quality reporting without significant failing. Consistent with the average of listed

bb High price risk exposure and/or long and uncertain cost pass-throughs. Company operates with some exposure to spot price volatility.

bbb Weighted average credit quality of actual and potential offtakers is in line with 'BBB' rating.

Latin America Utilities

Overall ESG

| Opera | ting I | Environment          |     |  |
|-------|--------|----------------------|-----|--|
| bbb   |        | Economic Environment | bbb | Average combination of countries where economic value is created and where<br>assets are located.  |
| bbb-  | T      | Financial Access     | bbb | Average combination of issuer specific funding characteristics and of the strength of<br>the relevant local financial market.                |
|       |        | Systemic Governance  | bb  | Systemic governance (eg rule of law, corruption; government effectiveness) of the<br>issuer's country of incorporation consistent with 'bb'. |
| b-    | ь      |                      |     |  |
| ccc+  |        |                      |     |  |

#### Regulatory Risk

| а    |   | Independence                | а   | Strong regulatory independence from central government.  |
|------|---|-----------------------------|-----|--|
| a-   | T | Balance                     | а   | Balanced framew ork between end users' and sector participants' needs. It seeks low<br>tariifs for users and attractive return on capital. |
| bbb+ |   | Transparency                | bbb | The tariff-setting procedure is transparent and includes the participation of industry<br>players.   |
| bbb  |   | Recourse of Law             | bbb | Procedures to appeal regulatory rulings are clear but long processing periods.<br>Companies can oppose or comment on regulations.          |
| bbb- |   | Timeliness of Cost Recovery | bbb | Moderate lag to recover capital and operating costs.   |

| Market |  |  |  |
|--------|--|--|--|
|        |  |  |  |
|        |  |  |  |
|        |  |  |  |

| a-   |   | Consumption Growth Trend | bbb | Customer and usage grow th in line with industry averages. |
|------|---|--------------------------|-----|--|
| bbb+ | T | Customer Mix             | bbb | Somew hat diversified customer base.                       |
| bbb  |   | Geographic Location      | bbb | Beneficial location or reasonable locational diversity.    |
| bbb- | 1 | Supply Demand Dynamics   | bb  | Uncertain outlook for prices and rates.                    |
| bb+  |   |                          |     |  |

#### Profitability

|      |   | ·                           |     |   |
|------|---|-----------------------------|-----|---|
| а    |   | Volatility of Profitability | bbb | Stability and predictability of profits in line with utility peers. |
| a-   | Т | Free Cash Flow              | а   | Structurally neutral to positive FCF across the investment cycle.   |
| bbb+ |   |                             |     |   |
| bbb  |   |                             |     |   |
| bbb- |   |                             |     |   |

#### **Financial Flexibility**

| а    | Financial Discipline          | bbb | Less conservative policy but generally applied consistently.  |
|------|-------------------------------|-----|---|
| a-   | Liquidity (Cash+CFO)/S-T Debt | bbb | One year liquidity ratio above 1.25x. Well-spread maturity schedule of debt but funding<br>may be less diversified. |
| bbb+ | FFO Interest Coverage         | а   | 5.5x  |
| bbb  | FX Exposure                   | а   | Profitability potentially exposed to FX but efficient hedging in place. Debt and cash<br>flows well-matched.        |
| bbb- |                               |     |   |

4

and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards National Standards Sector Board(SASB).

|   | CREDIT-RELEVANT ESG SCALE   |  |  |  |  |  |  |  |  |
|---|---|--|--|--|--|--|--|--|--|
| Н   | How relevant are E, S and G issues to the overall credit rating?  |  |  |  |  |  |  |  |  |
| 5   | Highly relevant, a key rating driver that has a significant impact on the rating<br>on an individual basis. Equivalent to "higher" relative importance within<br>Navigator.                           |  |  |  |  |  |  |  |  |
| 4   | Relevant to rating, not a key rating driver but has an impact on the rating in<br>combination with other factors. Equivalent to "moderate" relative importance<br>within Navigator.                   |  |  |  |  |  |  |  |  |
| 3   | Minimally relevant to rating, either very low impact or actively managed in a<br>w ay that results in no impact on the entity rating. Equivalent to "low er"<br>relative importance within Navigator. |  |  |  |  |  |  |  |  |
| 2   | Irrelevant to the entity rating but relevant to the sector.   |  |  |  |  |  |  |  |  |
| 1 Irrelevant to the entity rating and irrelevant to the sector. |   |  |  |  |  |  |  |  |  |

#### Governance (G)

| Governance (G)         |         |   |                                     |
|------------------------|---------|---|-------------------------------------|
| General Issues         | G Score | Sector-Specific Issues  | Reference                           |
| Management Strategy    | з       | Strategy development and implementation                       | Management and Corporate Governance |
| Governance Structure   | з       | Board independence and effectiveness; ownership concentration | Management and Corporate Governance |
| Group Structure        | з       | Complexity, transparency and related-party transactions       | Management and Corporate Governance |
| Financial Transparency | з       | Quality and timing of financial disclosure                    | Management and Corporate Governance |
|                        |         |   |                                     |

|                 |      |        | Over | all ESG Scale |
|-----------------|------|--------|------|---------------|
| key driver      | 0    | issues | 5    |               |
| driver          | 0    | issues | 4    |               |
| potential drive | r 12 | issues | 3    |               |
| not a rating    | 1    | issues | 2    |               |
| driver          | 1    | issues | 1    |               |

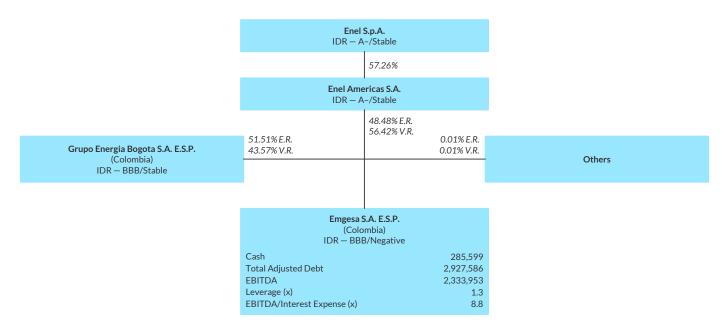

How to Read This Page ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies the some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5)

### **FX Screener**

Emgesa has no material exposure to FX volatility, as 100% of its financial debt is denominated in local currency and its U.S. dollar debt exposure is fully hedged. A portion of its revenues from its reliability charge are denominated in U.S. dollars and match with costs expressed in dollars. The effect of FX volatility on capex is limited, as no sizable capex program is pending in the short term.

The information in thisreport is provided" as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, surantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$ 10,000 to US\$ 15,000,000 (or the applicable currency equivalent) perissue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
