² Figures of the financial statements used in this presentation as of september 30th, 2015 were prepared in Colombian pesos under IFRS officially applied in the Colombia since January 2015. As a result of these transition during this year, the quarterly figures will be constantly subject to changes and adjustments, according to local regulation. The P&L statement as of september 30th, 2014 and the general balance sheet statement as of december 31st, 2014, used to calculate the variations with respect to the corresponding financial statements as of september 30th, 2015, were prepared under IFRS applicable to the Enel Group, which may vary in certain figures with respect to IFRS adopted in Colombia. The variations of the main figures of these two financial statements are presented only for informative purposes for the convenience of the readers of this presentation.

EMGESA'S 3Q 2015 MAIN HIGHLIGHTS

- El Quimbo Project:** as of september 2015, El Quimbo Hydroelectric Power Plant, reached a physical advance of 96.6% with a cumulative investment of USD\$1 billion (2010 constant USD), with important results in the removal of biological material from the flooding area and the construction of the cap of the deviation tunnel. Emgesa continued filling El Quimbo's reservoir as scheduled, during the third quarter of 2015. By the end of this quarter, the reservoir level was at 61% of its total volume and Unit 1 had been tested and aligned while Unit 2 completed the testing stage in October 2015
- Financial Results:** during the first nine months of 2015, Emgesa generated 21,7% of the system's electricity due to its diversified generation portfolio in three different river basins. Reservoirs and rain levels at Emgesa's plants ended the third quarter of 2015 at higher than historical averages, even under challenging weather conditions due to El Niño Phenomenon. As of september 30, 2015 Emgesa's reservoirs represented 42% of the Interconnected National System's (SIN) reservoirs with 4.4 TWh.

Operating revenues totaled COP\$2,17 trillion (USD\$820 million), a 6,4% increase compared to the same period of 2014. The main factors explaining this result include a 2.3% increase in energy generation, allowing Emgesa to have excess production to sale in the spot market at higher prices and a higher average Producer Price Index (PPI) level during 2015, which increased the revenues from contracts to the wholesale market.

Emgesa's net income decreased by 11.0% during the first nine months of 2015 as compared to the same period of 2014, due to a combination of higher financial net expenses and the impact of the 2015 wealth tax on the EBITDA, calculated at a rate of 1.15% on the equity hold as of January 1st, 2015, which under IFRS is considered an operating cost and not as an equity account as the Colombian GAAP did.

- IR Reward by Colombian Stock Exchange:** in August 2015 Emgesa received the renovation of the IR Reward by the Colombian Stock Exchange, recognizing the highest standards of transparency, corporate governance and best practices of investor relations adopted by issuers of securities in Colombia.

CODENSA'S 3Q 2015 MAIN HIGHLIGHTS

- Fitch Ratings confirmed Codensa's local AAA Ratings (col):** during 2015 Fitch Ratings confirmed the AAA local credit rating for Codensa with a stable outlook. This rating reflects the solid competitive position of Codensa as the largest distribution and commercialization company in Colombia, serving 23% of national demand. Furthermore, the rating agency highlighted the low risk business profile, the strong credit metrics, the high cash position, the transfer of know-how from the parent companies and the strong corporate governance practices of the company.
- IR Reward by Colombian Stock Exchange:** in august 2015 Codensa received the renovation of the IR Reward by the Colombian Stock Exchange, recognizing the highest standards of transparency, corporate governance and best practices of investor relations adopted by issuers of securities in Colombia.
- Public Lighting Modernization Project:** during 2015, Codensa concluded the first stage of the Public Lighting Modernization project with the installation of 10,426 LED bulbs in 31 of the main roads in Bogota reaching a total investment of about COP\$70,0 billion (USD\$28 million). Codensa will expand this first stage increasing the amount of LED bulbs installed in other important roads in Bogota to complete the 33,000 target agreed with the City of Bogota.
- Financial Results:** Codensa's EBITDA increased by 3.4% in the first nine months of 2015 as compared to the same period of 2014, mainly due to the effect of higher operating revenues as a result of higher Producer Price Index (PPI) in Colombia over the year, the growth of energy demand in Codensa's area of influence and increasing revenues from other business lines, such as infrastructure renting. The increase in the operational results compensated the negative effect of the 2015 wealth tax on the EBITDA.

Codensa reported a net income of COP\$374,2 billion (USD\$141,6 million) during the first nine months of 2015, down 8.5% compared to the same period of the previous year. This result was mainly due to the effects of the 2015 wealth tax recognition on the EBITDA, the adverse effect of the CPI on the financial expenses, an increase in the income tax rates and the surcharge in income tax for equality (CREE, from its Spanish acronym).
