**EMGESA S.A. ESP.  
ISSUER'S LEGAL SITUATIONS  
MARCH 01, 2016**

EMGESA S.A. ESP informs the general public that, with a decision dated February 22 of 2016 - issued under Popular Action No. 410012333 00020140052400 - the Huila Administrative Court decided to allow the EL Quimbo hydroelectric plant energy generation, plant that is the property of EMGESA, during 6 months until a project recovering oxygen levels in the Quimbo – Betania tranche is implemented. Additionally, the Huila Administrative Court ordered obtaining a policy from an insurance company for COP \$20,000,000,000 to cover economic and environmental damages the hydroelectric station operation could cause, according to Law 491 of 1999 and considering that on March 16 of 2015 EMGESA requested obtaining such policy.

It should be noted that EMGESA resumed the EL Quimbo operation on January 10 of 2016 according to a Protection of Rights Proceeding (Tutela) decision from the Third Neiva Criminal Court ordering the company to temporarily and immediately start generating energy with the station, and that such operation is being carried out with the ecologic flow established in the Environmental License, also performing water monitoring both at the reservoir area and downstream between the EL Quimbo Dan and the Betania inlet.
